Elite Contractor Supply was founded in 2004 to service the South Florida Construction Industry. We currently have eight trucks on the road to deliver to jobsites in 8 counties. We additionally service our customers by doing in house tool repair. We have many of the same employees that helped us start our business and plan their retention by fair business practices. We can drop ship materials anywhere in the continental United States. We plan for the future by growing and stabilizing our business through government contracts.
